

NEW! The Bushmaster .308 Caliber Rifles & Carbines...

All the Quality, Accuracy and Durability you've come to expect from Bushmaster. Now, just MORE OF IT!... IN .308 CALIBER.

Introduced in 2004, the Bushmaster .308 is patterned after the proven Bushmaster XM15 series of rifles but is chambered for the larger .308 Winchester (7.62 NATO) caliber. All models feature heavy alloy steel barrels in either 16" and 20" lengths with a variety of muzzle brakes / flash suppressors available. For optimum accuracy, the barrels are rifled 1 turn in 10" - right hand twist (four lands and grooves). A manganese phosphate coating affords complete protection against exterior corrosion and rust on the barrel and all critical steel parts of the rifle. Bushmaster .308 models include a 20 round magazine but will accept all readily available FN-FAL magazines – either metric or standard types.

The rifle's receivers are 7075T6 aluminum forgings with a hard anodize finish, and offer ambidextrous controls for bolt and magazine release. AR15 type receiver features including cartridge case deflector, a bolt hold-back mechanism, and bolt forward assist button are standard, and either A2 (solid carry handle) or A3 (removable carry handle) configurations are available. A2 "trapdoor" solid buttstocks are fitted on some models, others feature the Skeleton Stock. Another option is either the full AR style front sight, or a Three Rail Gas Block designed to avoid optics interference, and to offer accessory mounting points. A flip-up type front sight can be added to this gas block (see our Sights/Scope/Mounts Section). The Bushmaster .308 rifles are shipped complete with 20 Round Magazine, Operation and Safety Manual, and One Year Warranty. Complete .308 model listings are shown on the next page.

Bushmaster 20" Bbl. .308 Rifle in A3 "flat-top" configuration with Izzy Compensator

Scope shown on 20" Bbl. .308 Rifle is an option available in our Scopes and Mounts Section of this catalog.

Bushmaster 16" Bbl. .308 Carbine in A2 configuration with Skeleton Stock and Izzy Compensator

Bushmaster .308 Rifle Removable Carry Handle... This essential accessory for the Bushmaster .308 "flat-top" is now available. It is easily installed and removed on the Picatinny rail of the Upper by means of knurled thumbnuts. Exact zero repeat is ensured upon reinstallation, and it includes an M16A2 type Dual Aperture Rear Sight with windage and elevation adjustments. Machined from aircraft quality aluminum - finished in hard black anodize with a manganese phosphate finish on steel sight parts and knobs. (Part # 9349063-9-3) **\$ 219.95**

Bushmaster .308 Vented Free Floater Forend - Rifle & Carbine Lengths... Add additional accuracy to the Bushmaster .308 with this tubular aluminum, free floater forend. A machined barrel nut and locking ring replace your existing barrel nut (rifle's front sight, gas tube and barrel nut removal are required). Screw on the free-floater forend, and after "timing" the cooling vents, it is held in position with the locking ring. Knurled for a non-slip grip - a standard stud is included for bipod or sling mounting. All three parts are machined of high quality aircraft aluminum - black anodize finished.

.308 Free Floater Forend - Rifle Length... (VHG-3R) **\$ 99.95 / Carbine (Mid) Length...** (VHG-3M) **\$ 94.95**
