## BUSHMASTER CARBON 15 TOP LOADING RIFLE

This unique Bushmaster Carbon 15 model has been developed specifically for the California market (and other States with similar restrictions). It offers traditional AR-15 type features, rugged Carbon Fiber composite molded Receivers for light weight and durability, and a 10 Round Internal Magazine.

**Carbon15 Top Loading Rifle**  
Part # AZC-C15RM4FT

Rifling .....	<b>1 turn in 9"</b> [22.8 cm] <b>R.H. Twist / 6 grooves &amp; lands</b>
Weight - unloaded .....	<b>5.8 lbs.</b> [2.63 kg]

- To comply with California State Statutes, and for other States with similar restrictions, the Carbon 15 Top Loading Rifle has a 10 Round Internal Magazine that is loaded by simply pushing in the Receiver Takedown Pin and then pivoting open the Upper and Lower Receivers. This exposes the Internal Magazine components – which are permanently fixed in position within the Lower Receiver. Then cartridges can be inserted into the Magazine Feed Lips in the same manner as any removable AR-15 type Magazine. Internal Magazine capacity is limited to 10 Rounds, and the bottom of the Magazine Well is sealed.

- Lightweight Carbon Fiber Composite Receivers – 40% stronger and 40% lighter than comparable aircraft aluminum receivers – unaffected by moisture – will not corrode – matte black throughout (no surface finish to wear off). Upper Receiver includes anodized aluminum Picatinny rail for unlimited sight, scope or optics mounting.
- 16" M4 Profile Barrel chambered for 5.56mm NATO/.223 Rem. caliber – Chrome Lined in both Bore and Chamber for long wear and ease of maintenance – standard threaded muzzle (1/2" x 28 T.p.l.) fitted with Izzy Flash Suppressor. Barrel and other steel parts are Manganese Phosphate finished for protection against corrosion and rust.
- Front Sight is AR Type Base with Post – adjustable for elevation. Rear Sight is a Dual Aperture type adjustable for windage.
- 6 Position Tealstock offers light weight, carrying ease and quick handling. Carbine length Handguards have internal aluminum shields to protect against heat build-up in rapid fire sequences.
- Shipped in a Lockable Hard Case with Operation and Safety Manual, and Black Web Sling.
- One Year Bushmaster Warranty

Showing the Carbon 15 Top Loading Rifle with Receivers opened in preparation for loading Internal Magazine. Internal Magazine components are permanently fixed within the Lower Receiver.

The Carbon 15 Top Loading Rifle's Lower Receiver Magazine Well is completely sealed.
